ABOUT ADVANCIS

Since 1994 Advancis provides the security, safety and building management industry with its highly flexible and open architecture command & control system, WinGuard PSIM.

Advancis is committed to open architecture and vendor neutrality since its foundation. Our command & control technologies provide clients with freedom of choice and the ability to unify disparate system brands of all types into a single management application that offers enhanced security and greater system efficiency. WinGuard also reduces operational costs and provides a rapid return on investment.

Advancis is a constant innovator with regular product improvements and developments for the global PSIM market.

TECHNOLOGY PARTNER PROGRAM

We work in close partnership with an ever growing community of technology partners around the world, with currently over 400 integrations to best of breed vendors.

 With this close cooperation we can achieve a deep integration of our technology partners' systems and a comprehensive functional scope. Regular communications and meetings with the partners technical personnel ensures that our driver interfaces are always state of the art.

Advancis employs highly skilled and qualified employees who provide excellent support to fulfill the ongoing needs of our joint customers. Our joint value solution with partners generates greater market awareness and cross selling potential.

JOINT SOLUTION

WinGuard and Cathexis Vision take control room management to a new level with increased functionality and operational security with full systems integration of complete infrastructures, real time situational analysis of events, full system control and operator workflow guidance of each event to ensure that procedures are respected by operators. Our joint value solutions also evolve with customer needs as systems grow or require new integrations or custom features.
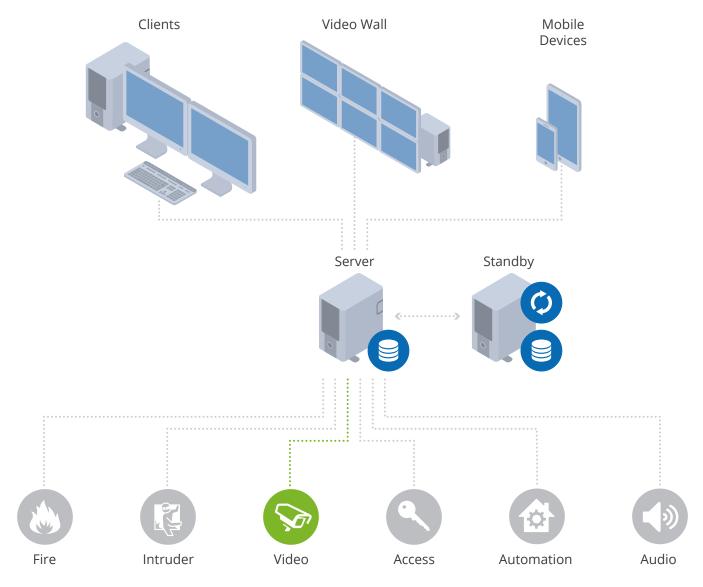

winguard
always retain control

- ✔ Open platform solution for complete infrastructure integration and management

- ✔ Flexible user interfaces that adapt to customer requirements

- ✔ Guided process instructions support the user in event processing

- ✔ Reports offer a quick overview of relevant key information

- ✔ Mobile apps provide insight to all incidents and operations at any time

- ✔ Scalability from a single workstation to multiple control centres with redundancy and failover

CathexisVision
IP Video Management Solutions

- ✔ **Video Analytics:** multi-zone, smart learning, motion detection algorithms, abandoned or removed object detection, loitering, speed, direction, line-crossing and several others.

- ✔ **ANPR:** easily searchable low- and high-speed ANPR solutions for parking/access control or high-speed freeway licence plate detection

- ✔ **Advanced Video Search:** sophisticated tools that dramatically speed up the ability to review and find specific & relevant footage: motion search in the area, thumbnail images activity trails while reviewing recorded video

- ✔ **Adjacent Camera Mapping:** Allows operators to display all the cameras that are directly adjacent of the focus camera for easy camera navigation
