ACCESS CONTROL

ACCESS CONTROL INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND ACCESS CONTROL

Combining advanced video management software and access control technology to help operators quickly make informed, safe decisions
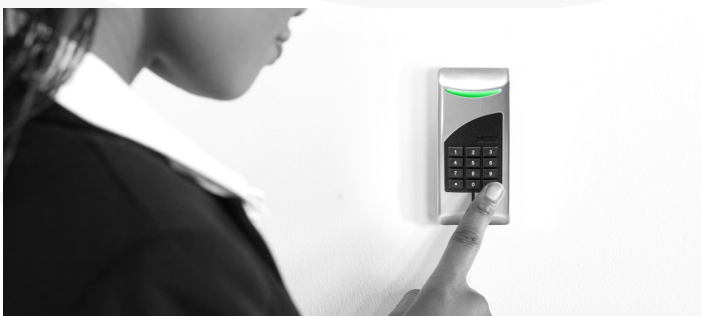

OVERVIEW

Cathexis, in partnership with Impro Technologies, has developed a powerful integration solution between the Portal Pro software and the CathexisVision video management software. This integration enables CathexisVision to receive information on general and zone events from the Portal Pro software.

Access control events are saved in a metadatabase and linked to the associated footage within CathexisVision. Operators can use advanced filters to search the database according to their requirements.

When an access control event has been detected - such as a door forced open, or a cardholder entering - the user can define a range of actions. To enhance the options available for users, doors can be allocated to a group for triggering customised actions.

The CathexisVision Impro Portal Pro integration enhances the efficiency of the operational environment and offers you an effective and valuable return on security investment.

SUMMARY

PARTNER: Impro Technologies

TYPE: Access Control

PRODUCT: Portal Pro

PACKAGE: CathexisVision 2020.4 and later

(for Portal Pro V4.1)

INTEGRATION CAPABILITIES

- Access control and CCTV on a single platform for streamlined operation.

- Associate cameras with access control events for real-time visual identification.

- Search and filter the database to find access control events and associated video footage.

- Generate reports in CathexisVision on data received from the Portal Pro software.

- Add device to a site map.

- Create unique actions triggered by access control events, such as:

    - Record or control cameras

    - Send event info to local or off-site control rooms

    - Send email or SMS notifications

   - Play audio clips
    - Control the device
