Carbon Suite

4.2 Release Notes

Contents

While Cathexis has made every effort to ensure the accuracy of this document, there is no guarantee of accuracy, neither explicit nor implied. Specifications are subject to change without notice.

1. Introduction

This document covers the additions, changes, and problem fixes made to software in the **Carbon Suite 4.2** which comprises the following products:

- CathexisVision Carbon 4.2
- CathexisVision Mobile 4.2
- CathexisVision MultiSite 4.2
- CathexisVision Enterprise 4.2

1.1 General Notices

1. The Carbon User Interface is supported from CathexisVision 2022.1 onwards.

2. CathexisVision Mobile is supported from CathexisVision 2022.1 onwards.

3. Enterprise is supported from CathexisVision 2021.1 onwards; however, it is recommended to be used with CathexisVision 2023.1 and later.

4. CathexisVision 2023 is the first CathexisVision server version to support CathexisVision MultiSite.

2. CathexisVision Carbon 4.2

The Carbon user interface is easy to navigate and intuitive to use, simplifying the management of CathexisVision sites and enabling streamlined, efficient video monitoring. The following changes have been made to Carbon 4.2.

2.1 Features

	Key Area	Software Change
1	User Interface	Updates have been made to the following translations: • Croatian • French • German • Italian • Portuguese • Russian • Spanish • Ukrainian

2.2 Fixes

	Key Area	Software Change
1	User Interface	Fixed a crash that occurred when selecting several Black Screen Monitoring (BSM) watch list resources with shift-click.
2	User Interface	Fixed an issue to prevent a crash after selecting a very small region of the reference image for feature search.
3	User Interface	Fixed Black Screen Monitoring memory leak.
4	User Interface	Event groups are now supported in the activity side panel.

3. CathexisVision Mobile 4.2

CathexisVision Mobile packs in advanced features for remote video monitoring and boasts a simple, sleek user interface. The following changes have been made in CathexisVision Mobile 4.2:

3.1 Features

	Key Area	Software Change
1	User Interface	Updates have been made to the following translations: • Croatian • French • German • Italian • Portuguese • Russian • Spanish • Ukrainian

3.2 Fixes

	Key Area	Software Change
1	User Interface	Fixed Black Screen Monitoring (BMS) memory leak.

4. CathexisVision MultiSite 4.2

CathexisVision MultiSite is a cost-effective solution for monitoring multiple sites centrally. There are no new Features, Modifications, or Fixes for CathexisVision MultiSite 4.2.

5. CathexisVision Enterprise 4.2

CathexisVision Enterprise is a premier solution for the central management of user access, connectivity, and assets across an estate of installations. The following changes have been made in CathexisVision Enterprise 4.2:

5.1 Fixes

1	User Interface	Fixed a problem where the roles in sub-domains were not being shown correctly in the Carbon role configuration for Enterprise.
