

MAVILI FIRE ALARM SYSTEM INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND FIRE SAFETY

Improve emergency response times with integrated fire alarms and video management

OVERVIEW

The CathexisVision Mavili Fire Alarm System integration creates safer environments by managing emergency situations more effectively. The integration allows CathexisVision system events to be triggered automatically based on information received from Maxlogic SPRVSR+, Mavili's graphical monitoring and fire management system.

The Mavili Fire Alarm System is an intelligent, addressable fire alarm system, often used in large and medium-sized projects and intelligent buildings. Smoke detectors, heat sensors, and multi-sensor detectors identify hazards and send alerts to SPRVSR+ which indicates the location of the fire.

CathexisVision further improves reaction time in emergency situations by providing automatic system actions in response to events received from the integration. These include notifications, alarms, recording nearby cameras, and the option to control the SPRVSR+ graphical interface with a Focus tool, which locates the incident quickly.

CathexisVision offers operators and managers a powerful feature set that includes user-friendly databases of all events, saved together with associated video footage, as well as efficient monitoring tools for improved real-time reactions.

SUMMARY

PARTNER: Mavili Elektronik
TYPE: Graphical Monitoring and Fire Management System
PRODUCT: Maxlogic SPRVSR+
PACKAGE: CathexisVision 2022.2

INTEGRATION CAPABILITIES

- Monitor CCTV and fire alarms on a single system which provides video verification of fire alarm events.
- Search and filter the database to find access control events and associated video footage.
- Generate reports in CathexisVision on data received from the SPRVSR+ software.
- Add device to a site map.
- Create unique actions triggered by fire alarm events, such as:
 - Record or control cameras
 - Send event info to local or off-site control rooms
 - Send email or SMS notifications
 - Play audio clips

Integrated Solution

Enhancing efficiency and effectiveness to address your security challenges.

CATHEXISVISION MAJOR FEATURES

-  Enterprise, multi-site architecture
-  Video analytics / AI
-  SMART forensic search features
-  Alarm / event management
-  Cybersecurity

Fire Alarm Management System

- **Connection State**
- **Fire Event Information**
Time, Date, Alarm Description, Map, Device Location, Device Name, Device Code, Device ID, Network, Panel, Loop, Zone
- **Focus Command**
Centre the map in SPRVSR+
