

CATHEXISVISION

AVS ELECTRONICS ALARM PANEL INTEGRATION

CATHEXIS
Securing the Future

Combining advanced video management software and alarm panel technology to help operators make informed, safe decisions, quickly.

AVS ELECTRONICS ALARM PANEL INTEGRATION

Cathexis has developed an integration with the **AVS Electronics AVS XTREAM 32 EVO**, connecting the technologically advanced, reliable AVS alarm system with the sophisticated capabilities of CathexisVision in a single solution.

CathexisVision offers an efficient, all-in-one security solution for managing third-party systems. Operators can view and monitor **AVS** alarm panel events from the CathexisVision interface, together with associated video footage of the events. Operators can even issue commands to the device, such as arming, and disarming zones. Additionally, the integration allows users to configure suspicious events – such as denied access – to trigger alarms and notifications. All video and access control data is stored in one place: our reliable and accessible database.

Together, Cathexis and **AVS** offer decades of experience in providing security solutions that are designed to enhance operational efficiency, emergency response times, and incident management.

PARTNER: AVS Electronics

TYPE: Alarm Panel

PRODUCT: AVS XTREAM 32 EVO

PACKAGE: CathexisVision 2023.1 and later

INTEGRATION CAPABILITIES

- Manage alarm panels and video monitoring from a single, streamlined security solution.
- Get reliable evidence and video verification of alarm panel events, speeding up response times.
- Database mining for easy data sorting and searching as well as report generation.
- Group zones for easy monitoring and greater control.
- Easily view device event status and locations with site maps.
- Link alarm panel events to automated actions such as:
 - Record or control cameras
 - Send event info to local or off-site control rooms
 - Send email or SMS notifications
 - Play audio clips
 - Control the device
