

## C•CURE 9000 ACCESS CONTROL INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND ACCESS CONTROL

Manage access more efficiently  
with advanced video management  
software

### OVERVIEW

In this integration with C•CURE 9000, Cathexis augments the power and accessibility of the web-based access control management from JCI's Software House with the sophisticated feature set of CathexisVision.

User information and access events are sent from the C•CURE 9000 system to CathexisVision, where they are used to trigger actions such as alarms, notifications, and recording. Additionally, doors may be controlled from CathexisVision – either manually, or as an automatic response to events detected by the C•CURE 9000 system.

CathexisVision stores and organises user information and access events, which are easily retrieved using filters including time, event type, door, and personnel, which can be searched by name. The CathexisVision database presents user information and access events alongside associated video footage for easy, efficient video playback.

CathexisVision's extensive suite of video management features and search tools, together with camera monitoring and video analytics, continue to offer a comprehensive and reliable security solution with exceptional integration capacity. The CathexisVision C•CURE 9000 integration is a powerful security solution that can address your site's access control management requirements.

### SUMMARY

C•CURE 9000

**PARTNER:** JCI/Software House

**TYPE:** Access Control

**PRODUCT:** C•CURE 9000

**PACKAGE:** CathexisVision 2022.2

### INTEGRATION CAPABILITIES

- Monitor CCTV and access control on a single system which provides video verification of access control events.
- Search and filter the database to find access control events and associated video footage.
- Generate reports in CathexisVision on data received from the C•CURE 90000 software.
- Add device to a site map.
- Create unique actions triggered by access control events, such as:
  - Record or control cameras
  - Send event info to local or off-site control rooms
  - Send email or SMS notifications
  - Play audio clips

# Integrated Solution

Enhancing efficiency and effectiveness to address your security challenges.

## CATHEXISVISION MAJOR FEATURES

-  Enterprise, multi-site architecture
-  Video analytics / AI
-  SMART forensic search features
-  Alarm / event management
-  Cybersecurity

## Web-based access control events

- **Door event information**  
Name, Mode, Alarm Status, Area In/Out
- **Door states**  
Locked or Unlocked
- **Command doors**  
Lock, Momentary, Unlock
