

# CASE STUDY: TOPKAPI PALACE

CATHEXIS®

The **Topkapi Palace in Istanbul** was the residence of Ottoman sultans and administrative centre of the imperial court from the 15th to mid-19th century. Today, the complex is a **UNESCO world heritage site** and museum showcasing collections of Ottoman artefacts and history. The CathexisVision video surveillance management solution helps protect this historic site, managing a system of over **1000 cameras** installed by our valued partner, Vega CCTV Solutions.

CathexisVision's advanced video analytics and event-based monitoring features reduce risk, assisting staff with situational awareness. CathexisVision ensures that the Topkapi Palace will be preserved for future generations.
