

NGARO INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND ANALYTICS

Combining state-of-the-art video management software and analytics so that operators are informed to make smart, safe decisions

OVERVIEW

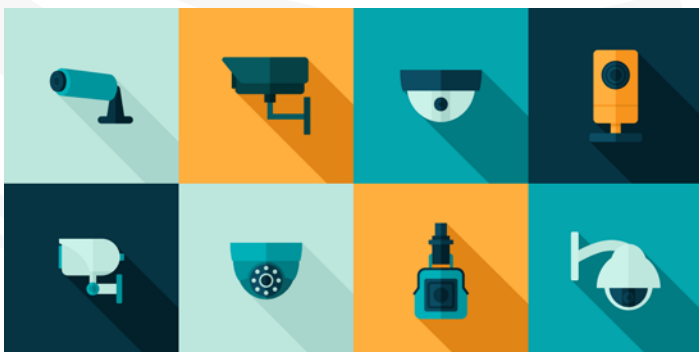

Cathexis has partnered with Grekkom Technologies to develop a powerful integration solution between the Ngaro analytics product and the CathexisVision video management software.

Through this integration, the Ngaro software monitors camera activity. When an object is detected, the integration sends an alert to CathexisVision, which creates events and database entries for the duration of alarms.

The integration metadatabase saves these transactions along with the associated video footage. The stored information includes the start and end times of alarms, the devices they come from, message alerts, and target IDs. Flexible filters allow users to easily search the database to find events and video for immediate playback.

Live events can be configured to trigger certain actions, such as controlling the integration device, sending emails, playing audio clips or recording cameras.

By enhancing operational effectiveness and efficiency, the CathexisVision Grekkom Ngaro integration brings tremendous value to any video surveillance solution.

SUMMARY

PARTNER: Grekkom

TYPE: Analytics

PRODUCT: Ngaro

PACKAGE: CathexisVision 2020.4 and later

INTEGRATION CAPABILITIES

- Video analytics and CCTV on a single platform for streamlined operation.
- Ability to associate cameras to the object detection event for real-time visual identification.
- Graphical representation of status and events on the map interface.
- Filtering the database to find events and associated video footage.
- Create unique actions on specific analytics events:
 - Send event info to local or off-site control room
 - Send email or SMS notifications
 - Control the Ngaro device
 - Record cameras
 - Play audio clips

Integrated Solution

Providing enhanced efficiency and effectiveness to address your security challenges.

CATHEXISVISION MAJOR FEATURES

-  Enterprise, multi-site architecture
-  Video analytics / AI
-  SMART forensic search features
-  Alarm / event management
-  Cyber secure

Analytics

- Object detection and tracking
- Alarm events
- Alarm location
- Dates and times of events
