KERI SYSTEMS INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND ACCESS CONTROL

Fully integrated Video Management Software (VMS) system with complete Access Control integration capability.

OVERVIEW

Cathexis has developed a powerful and seamless integration solution between Keri Systems Access Control and CathexisVision Video Management software.

This integration allows all access control events to be received by Cathexis, whereby every event that takes place is associated with the corresponding camera assigned to said controller or door. As well as having the event overlaid on a live screen with all the relevant data it is also saved with a snippet of video data in a searchable "meta-database".

This database includes all the relevant details of the event such as cardholder name, time/date, door etc. and all fields are searchable with the extensive Cathexis filter options allowing users to search on one or many of the filters. Users can also set up notifications for events such as certain cardholders can trigger an alert or a door forced open can trigger an alarm.

From any control room operator's perspective this is the ideal scenario as all this and more is controlled from the Cathexis UI making it a simple seamless integration with a focus on effectiveness and efficiency.

SUMMARY

PARTNER: Keri Systems

TYPE: Access Control

PRODUCT: Keri Systems

PACKAGE: CathexisVision 2020.2 and later

INTEGRATION CAPABILITIES

- Access control and CCTV on a single platform for simplified operation.
- Ability to associate cameras to the precise access control event for real-time visual identification.
- Graphical representation of status and events on the map interface.
- Mining of the database to find access control events and associated video footage.
- Create unique actions on specific access control events. e.g:
  - Switch access point camera to selected screen
  - Send event info to local or off-site control room
  - Send email or SMS notifications
  - Move PTZ cameras to preset positions associated with access points
  - Play audio clips
 - Switch outputs
