

ACCESS CONTROL INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND ACCESS CONTROL

Combining advanced video management software and access control to make your environment safer and more efficient

OVERVIEW

Cathexis has partnered with Nedap to offer an integration between CathexisVision and AEOS, Nedap's physical access control solution. Nedap AEOS is a scalable and secure system, managing access control hardware, users and event databases across sites. CathexisVision enhances how this data can be used, and links access control information to video footage, enabling quicker response times and a more secure work environment.

The CathexisVision software uses AEOS access control information to trigger responses such as recording on cameras, and notifications. This integration also enables commands to AEOS, such as door locking or unlocking. CathexisVision allows access control events to be saved in the database together with the associated video footage. The user-friendly database can be searched using filters such as time, door, or description of the event.

Cathexis is proud to collaborate with an international partner whose mission is to provide technology for more productivity and excellence in the workplace. CathexisVision, together with Nedap AEOS, is improving the speed and scope of access control functionality.

SUMMARY

PARTNER: Nedap

TYPE: Access Control

PRODUCT: AEOS 2021.1.1

PACKAGE: CathexisVision 2022.1

INTEGRATION CAPABILITIES

- Access control and CCTV on a single platform for streamlined operation.
- Associate cameras with access control events for real-time visual identification.
- Search and filter the database to find communication events and associated video footage.
- Generate reports in CathexisVision on data received from the Nedap AEOS software.
- Add device to a site map.
- Create unique actions triggered by access control events, such as:
 - Record or control cameras
 - Send event info to local or off-site control rooms
 - Send email or SMS notifications
 - Play audio clips

Integrated Solution

Enhancing efficiency and effectiveness to address your security challenges.

CATHEXISVISION MAJOR FEATURES

-  Enterprise, multi-site architecture
-  Video analytics / AI
-  SMART forensic search features
-  Alarm / event management
-  Cybersecurity

Access Control

- Alarms
- Door open | Open too long
- Lock | Unlock | Emergency unlock
- System status
- Command Doors: Lock | Unlock | Normalise
