

# STENTOFON INTERCOM INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND COMMUNICATIONS

Combining state-of-the-art video management software and communications technology to keep operators informed

## OVERVIEW

Cathexis, in partnership with Zenitel, has developed an integration solution between the Stentofon intercom and the CathexisVision video management software.

The integration displays device events in order to log calls. When there is a call on the intercom, an event is received and logged by the CathexisVision software. Selected cameras can be associated with the intercom.

These events and associated video are saved in a metadatabase, storing information about the date, start and end time of calls, and which station they occurred at. Operators can view an entry's associated recording, and search the database using flexible filters.

Operators can monitor events happening on-site or configure the system so that detected events trigger actions, such as sending an email alert or playing an audio clip.

The CathexisVision Stentofon intercom integration increases the efficiency of the operating environment by seamlessly connecting the two systems.

## SUMMARY

**PARTNER:** Zenitel

**TYPE:** Communications

**PRODUCT:** Stentofon intercom

**PACKAGE:** CathexisVision 2020.2 and later

## INTEGRATION CAPABILITIES

- Intercom and CCTV on a single platform for simplified operation.
- Ability to associate cameras with the intercom event for real-time visual identification.
- Mining of the database to find intercom events and associated video footage.
- Create unique actions when a call triggers an event, for example:
  - Record camera
  - Send event info to local or off-site control room
  - Call base-station
  - Send email notifications
  - Play audio clips

# Integrated Solution

Providing enhanced efficiency and effectiveness to address your security challenges.

## CATHEXISVISION MAJOR FEATURES

-  Enterprise, multi-site architecture
-  Video analytics / AI
-  SMART forensic search features
-  Alarm / event management
-  Cybersecurity

 **Intercom**

- Device events
- Call start and end times
