CathexisVision

VERSION **2023**

CathexisVision empowers you to:

- Protect people
- Reduce risks to infrastructure
- Save costs
- Respond to events quickly

CathexisVision MultiSite

CathexisVision 2023 is the first release to support CathexisVision MultiSite, a cost-effective solution for multi-site management that is accessible through Carbon.

Control Room Management Made Easy

With CathexisVision 2023, operators are empowered to respond to events rapidly and effectively – saving time, reducing risks to infrastructure, and simplifying site management.

- The site monitor feature provides intelligent monitor control via the Carbon UI and CathexisVision Mobile. Operators can enjoy the ease of customizable video wall layout in Carbon, as well as control over what content is sent to the site monitor.
- Push notifications from VMS sites are a must-have feature in effective control room management. Operators and managers are alerted to events instantly, facilitating faster reaction times to security events.
- Updates to access rights to audio I/O on cameras offer more control over user customization.

Reliable Evidence

CathexisVision 2023 continues to provide partners with trusted and secure video evidence.

- Expand your capabilities with improved **search** and **export** tools.
- Enjoy secure encrypted video evidence with improved **encrypted camera connection** performance on network cameras.

Enhanced Operational Efficiency

CathexisVision 2023's features build on the **trusted video analytics** suite to expand the software's scope of detection, intelligent analysis and automated action:

- Deep neural network **AI thermal** and **RGB models** for cameras enhance the video analytics offering.
- Updates to the **backend** make use of the latest developments, keeping CathexisVision at the forefront of **AI-powered** video analytics.
- New features have been added to our **ANPR** detection allowing for even more precision in number plate detection and vehicle classification.
- Day/night settings allow for further video analytics customization.

A continually expanding suite of integrations

CathexisVision's **capacity for interoperability** with other security and management systems sets it apart. The suite of integrations continues to expand, with the following additions and updates having been made since 2022:

- AVS Alarm Panel
- Dormakaba Access Control
- SPAR dStore POS
- Weighcomm Weighbridge
- C-Cure Access Control
- ZKTeco Access Control
- Southwest Microwave Intrepid POE hardware
- Mavili Fire Panel
- Mettler Scale UC3 integration now supports sending transaction data to the Edeka POS integration
- Added support for Mobotix ONVIF edge review & insertion
