

## Intransa Certified Partners

### Intransa Technology Labs

- The Intransa Technology Labs jointly test & certify 3rd party applications and hardware with their manufacturers for use in physical security deployments
- Certification covers integration with the physical security industry's leading server, storage and appliance platforms from Intransa
- Testing helps to identify & eliminate many installation, performance, operational and interoperability challenges and issues in advance of customer installation for risk free deployments & smooth continuing operation
- Hundreds of IP cameras (standard, HD & megapixel) and video management systems, video analytics, access control, PSIM and other software applications have achieved CERTIFIED status
- Dozens of the most popular software applications have achieved the advanced SELECT CERTIFIED or ultimate SELECT ELITE CERTIFIED level, and are available as software media kit choices for rapid setup and activation, without use of DVDs, CDs or live Internet access for downloading onsite
