

ALARM PANEL INTEGRATION

POWERFUL INTEGRATED SOLUTIONS FOR VIDEO SURVEILLANCE AND ALARM SYSTEMS

Combining advanced video management software and alarm panel technology to help operators make informed, safe decisions, quickly

OVERVIEW

Cathexis, in partnership with Jablotron, has developed a powerful monitoring solution that connects Jablotron's rapid-response alarm system with the sophisticated capabilities of CathexisVision in a single, cost-effective package. The CathexisVision Jablotron Alarm Panel integration allows operators to control alarm panels, customise responses to security events, and manage associated video footage, all from one interface.

CathexisVision software includes standard responses to panel events such as initiating recording on cameras or sending an email. All associated footage is databased, and can be easily searched using a wide range of filters, including the time, and description of the incident.

In addition, this integration allows operators with access rights to issue commands to the device from the CathexisVision interface, such as arming, partially arming, or disarming. Alternatively, these responses can be configured to trigger automatically on specified alarm panel incidents. Individual and group setup options are available for panels.

CathexisVision and Jablotron offer decades of combined experience in providing security solutions that are effective and easy to operate. The integration has been developed to create a smooth experience for the end user, improving the efficiency of the control room and providing outstanding value with a straightforward yet technologically sophisticated product.

SUMMARY

PARTNER: Jablotron

TYPE: Alarm Panel

PRODUCT: 101K LAN 3G

PACKAGE: CathexisVision 2021.2 and later

INTEGRATION CAPABILITIES

- Alarm panels and CCTV on a single platform for streamlined operation.
- Associate cameras with alarm panel events for real-time visual identification.
- Search and filter the database to find alarm panel events and associated video footage.
- Generate reports in CathexisVision on data received from Jablotron devices.
- Add device to a site map.
- Create unique actions triggered by alarm panel events, such as:
 - Record or control cameras
 - Send event info to local or off-site control rooms
 - Send email or SMS notifications
 - Play audio clips
 - Control the device

Integrated Solution

Enhancing efficiency and effectiveness to address your security challenges.

CATHEXISVISION MAJOR FEATURES

-  Enterprise, multi-site architecture
-  Video analytics / AI
-  SMART forensic search features
-  Alarm / event management
-  Cyber security

JABLOTRON
CREATING ALARMS

Alarm Panel

- Up to 50 zones, 50 user codes, 8 sections, and 16 programmable PG outputs
- Intruder, fire, and panic alarms
- Internal and external sirens
- Entrance and exit delays
- Commands on section and PG
- Device, panel, and section states
- Communication channel status and details
