- 3 Axis Joystick

Description

These keyboards have been designed specifically to meet the needs of Video Management System (VMS) operators. The keyboards are fully programmable, providing exceptional integration with CathexisVision VMS functions.

The features of the KBD 3000 and 3100 are identical, except that the KBD 3100 has an added USB connection.

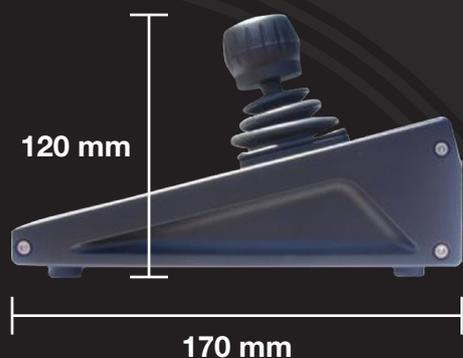

With ergonomic design and textured finishes, the Cathexis KBD 3000 and KBD 3100 keyboards are aesthetically pleasing and powerfully functional complements to CathexisVision.
